The *Ghostwalk Campaign Option* was released only a short time before the D&D v.3.5 rules were. This document provides all the changes that should be made to the book to update it for use with the new rules. A few clarifications are included here as well.

Minor or obvious changes that a reasonable person could determine without effort, or which have no effect on the game mechanics of the book, have been omitted unless entire sections are being replaced. Such changes include the following.

- The number of 5-foot squares corresponding to a creature's speed,
- A separate attack entry for any monster that has only one attack form, or whose full attack is identical to its normal attack,
- Changing "Face/Reach" to "Space/Reach" in cases where the corresponding numbers remain the same,
- Changing a spell's casting time from "1 action" to "1 standard action,"
- Changing a magic item's "Market Price" to "Price," and so forth. Changes such as these are left in the reader's hands. All other pertinent adjustments, however, are given here.

Also included with this document is a map that was dropped from the book for space reasons. With this bonus map and the changes indicated here, your *Ghostwalk* campaign can be better than ever before. So get out your pen and start marking these changes in your book!

Page 31, Enervating Touch:

Add to the end of the first paragraph of the Benefits section: “You may use this attack once per day per character level.”

Page 32, Extra Favored Enemy:

Like class-based favored enemy bonuses, the bonuses granted by this feat increase in increments of +2. When you use this feat to gain a new favored enemy, you get only a +2 bonus against that enemy. You do not get the extra +2 bonus (which can be allocated anywhere) that you would get for gaining a new favored enemy by level increase.

Change “Initially, you gain the standard +1 bonus” to “Initially, you gain the standard +2 bonus.”

Delete “(by +1 at 5th, 10th, 15th, and 20th ranger level).”

Change “For example, suppose you select goblinoids as your first favored enemy when you are a 1st-level ranger and magical beasts as your second when you reach 5th level. Then you take Extra Favored Enemy as your feat at 6th level and select aberrations. At this point, you have a +2 bonus against goblinoids and a +1 bonus against both magical beasts and aberrations. When you reach 10th level, your bonuses rise to +3 against goblinoids and +2 against magical beasts and aberrations” to “For example, suppose you select goblinoids as your first favored enemy when you are a 1st-level ranger and magical beasts as your second when you reach 5th level. You choose to allocate your extra +2 bonus against goblinoids, giving you a +4 bonus against goblinoids and a +2 bonus against magical beasts. Then you take Extra Favored Enemy as your feat

at 6th level and select aberrations. At this point, you have a +4 bonus against goblinoids and a +2 bonus against both magical beasts and aberrations. When you reach 10th level, you choose monstrous humanoids as your new favored enemy and allocate your extra +2 to goblinoids. Now your bonuses are +6 against goblinoids and +2 against magical beasts, aberrations, and monstrous humanoids.”

Combat

This vampire's slam attack is treated as a magic weapon for the purpose of overcoming damage reduction. The DC is 20 for the Will save against this vampire's domination ability, and for the Fortitude save to remove a negative level caused by its energy drain.

Aversion (Sp): A yuan-ti abomination can psionically create a compulsion effect targeting one creature within 30 feet. The target must succeed on a DC 20 Will save or gain an aversion to snakes for 10 minutes. Affected creatures must stay at least 20 feet away from any snake or yuan-ti, alive or dead; if already within 20 feet, they move away. A subject unable to move away, or one attacked by snakes or yuan-ti, is overcome with revulsion. This revulsion reduces the creature's Dexterity score by 4 points until the effect wears off or the subject is no longer within 20 feet. This ability is otherwise similar to *antipathy* as the spell (caster level 16th). The save DC is Charisma-based.

Constrict (Ex): An abomination deals 1d6+10 points of damage with a successful grapple check.

Improved Grab (Ex): To use this ability, an abomination must hit a Large or smaller creature with its bite attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity. If it wins the grapple check, it establishes a hold and can constrict.

Poison (Ex): Injury, Fortitude DC 14, initial and secondary damage 1d6 Con. The save DC is Constitution-based.

Produce Acid (Sp): An abomination has the psionic ability to exude acid from its body, dealing 3d6 points of acid damage to the next creature it touches, including a creature hit by its bite attack. If the yuan-ti is grappling, constricting, or pinning a foe when it uses this power, its grasp deals 5d6 points of acid damage. The acid becomes inert when it leaves the yuan-ti's body, and the yuan-ti is immune to its effects.

Spell-Like Abilities: At will—*animal trance* (DC 18), *entangle* (DC 17); 3/day—*deeper darkness*, *neutralize poison* (DC 20), *suggestion* (DC 19); 1/day—*baleful polymorph* (DC 21; into snake form only), *fear* (DC 20). Caster level 10th. The save DCs are Charisma-based.

Chameleon Power (Sp): A yuan-ti abomination can psionically change the coloration of itself and its equipment to match its surroundings, granting it a +10 circumstance bonus on Hide checks.

Skills: The abomination receives a +8 racial bonus on Climb checks and can always choose to take 10 on Climb checks, even if rushed or threatened. A yuan-ti abomination has a +8 racial bonus on any Swim check

to perform some special action or avoid a hazard. It can always choose to take 10 on a Swim check, even if distracted or endangered. It can use the run action while swimming, provided it swims in a straight line.

Vampire Weaknesses: Unlike landbound vampires, a vampire with a natural swim speed is not harmed by immersion in water and can cross running water without penalty.

*Yuan-ti abominations using *chameleon power* gain a +10 circumstance bonus on Hide checks.

Combat

This mumia prefers to strike at a distance with its bow, retreating in between strikes to let its fast healing take care of any damage its foes have dealt.

A medusa tries to disguise its true nature until the intended victim is within range of its petrifying gaze, using subterfuge and bluffing games to convince the target that there is no danger. It uses normal weapons to attack those who avert their eyes or survive its gaze, while its poisonous snakes strike at adjacent opponents.

Petrifying Gaze (Su): Turn to stone permanently, 30 feet, Fortitude DC 15 negates. The save DC is Charisma-based.

Poison (Ex): Injury, Fortitude DC 13, initial damage 1d6 Str, secondary damage 2d6 Str. The save DC is Constitution-based.

Withering Touch (Su): A creature hit by the mumia’s snakes must attempt a Fortitude save (DC 15) or lose 2 points of Constitution as the attacker absorbs moisture and energy from its target. This effect is in addition to any other effects of the mumia’s natural attack.

Fast Healing (Ex): The mumia heals 2 points of damage each round so long as it has at least 1 hit point. If reduced to 0 hit points, it is destroyed.

Turn Resistance (Ex): The mumia medusa is treated as an 8-HD undead for the purpose of turn, rebuke, bolster, and command attempts.
